

# Climate change

Climate change<sup>1</sup> is one the most important challenge of humankind in the world. We have many reasons about Climate change. Firstly the forest fires like as happened in the Amazon. Secondly gasoline-powered vehicles. for example cars and airplanes. Also nuclear tests such as weapons of mass destruction<sup>2</sup> or nuclear reactors<sup>3</sup> such as Fukushima and Chernobyl. There are several<sup>4</sup> solutions to combat climate change. Firstly governments must find eco-friendly<sup>5</sup> alternatives, however, there are non-cooperative<sup>6</sup> governments that are withdrawing from the Paris climate agreement, such as the U.S and the Brazilian governments. Secondly the media and civil society<sup>7</sup> institutions<sup>8</sup> must cultivate<sup>9</sup> awareness in people. in conclusion, We human beings, individuals<sup>10</sup> and governments ,must work together to Solve the problem, or we fall into a big problem that can not be solved without paying the price of the destruction of the earth.

---

<sup>1</sup> occurs when changes in Earth's climate system result in new weather patterns that remain in place for an extended period of time.

<sup>2</sup> WMD) is a nuclear, radiological, chemical, biological, or any other weapon that can kill and bring significant harm to numerous humans or cause great damage to human-made structures

<sup>3</sup> are the heart of a nuclear power plant. They contain and control nuclear chain reactions that produce heat through a physical process called fission.

<sup>4</sup> separate or respective.

<sup>5</sup> not harmful to the environment.

<sup>6</sup> a farm, business, or other organization that is owned and run jointly by its members, who share the profits or benefits.
